S PhytoCellTec™

# PhytoCellTec™ Goji Stem cell activation for a V-shaped face

PhytoCellTec<sup>™</sup> Goji is based on a plant stem cell culture of a goji seedling that vitalizes mesenchymal stem cells to ensure an improved V-shaped face.

#### The issue

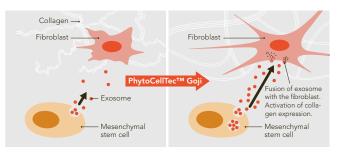

As we age, the production of collagen and elastin is reduced, which results in sagging skin that can most notably be observed at the face contours of the jawline. In addition, mesenchymal stem cells are also aging and this reduces their regenerative properties.

#### The solution

Mesenchymal stem cells have been shown to improve collagen production and regenerate the skin, for example during wound healing. These processes are mediated by vesicles known as exosomes which are produced and secreted by these stem cells. Exosomes are small, approximately 100 nm vesicles that are surrounded by a membrane which contains messenger molecules such as RNAs, proteins and lipids. Exosomes derived from mesenchymal stem cells have been shown to have a beneficial effect on other cell types such as fibroblasts and are currently being heavily investigated for their diagnostic and therapeutic purposes.

## The benefit

PhytoCellTec<sup>™</sup> Goji revitalizes mesenchymal stem cells and boosts their exosome production. This results in the improved production of extracellular matrix components such as collagen and elastin by fibroblasts. Therefore, one can support the dermal rejuvenation of the skin by stimulating mesenchymal stem cells in order to produce more exosomes. This will in turn lead to a reduced wrinkle appearance, less sagging and thus an improved V-shaped face.

Exosomes from mesenchymal stem cells rejuvenate fibroblasts.

## The plant

The plants of the superfruit Goji (*Lycium barbarum*) are native to Southeast Europe and Asia. They belong to the nightshade family – just like tomatoes and potatoes – and they grow up to 3 meters high. The red-orange goji berries that are harvested from this plant are one of the most famous superfruits. Nowadays, goji berries are eaten all over the world, mostly in dried form, and there are various goji berry supplements on the market with the reported effect claims ranging from anti-aging, immune boosting and energizing to improved memory.

**INCI (EU/PCPC) Declaration:** Lycium Barbarum Callus Culture Extract (and) Isomalt (and) Lecithin (and) Aqua/Water

# Study results

Stimulation of Extracellular Matrix Genes through Cell-to-Cell Communication					
Treatment: Parameters:	Human mesenchymal stem cells (MSCs) 1% Goji stem cell extract Human MSCs were treated with 1% Goji stem cell extract for a period of 72 h. The supernatant was used to treat fibroblasts. Gene expression of several ECM factors <b>of collagen and elastin in fibroblasts</b>	Conditioned medium from untreated MSCs Conditioned medium from MSCs treated with 1% Goji stem of the second stream	cell extract

# Improvement of Wrinkle Depth

]	Volunteers:	23 Caucasian women aged between	
J		41 and 69 years with signs of photoaging	
	Test compound:	<b>mpound:</b> 0.4% PhytoCellTec™ Goji, placebo	
	Treatment:	Half-sided application on the face	
		twice daily for 56 d	
	Parameters:	Change in wrinkle depth (PRIMOS lite)	

 $\rightarrow$  Average decrease in wrinkle depth of 11 % compared to the placebo. Visibly improvement of fine wrinkles below the eyes as well as deeper lines.

#### Improvement of Oval Face Shape

Volunteers:	67 Caucasian women aged between 39 and 70 years		( ALIMAN )
Test compound:	0.4% PhytoCellTec™ Goji	Before	A
Treatment:	Application on the entire face and neck twice daily for 28 d		( )
Parameters:	Size of the neck/submandibular triangle area to de-termine the facial sagging and oval face shape with image analysis of Visioface pictures	After 28 days	

→ Significant improvement of the oval face shape

## In Addition

SWISS

OUALITY

Improvement of Skin Density in Photo-Aged Skin: Significantly increased skin density by 6% after 28 days compared to initial conditions, reduction of the so-called subepidermal low-echogenic bands (SLEB) in photo-aged skin.

Increase in Exosome Production: Maintains stemness and boosts exosome production in mesenchymal stem cells.

#### Recommended use level: 0.4-1%

Characteristics: Powder, water-soluble, without preservatives and alcohol

**Applications:** Tightening and contouring serums for face and neck, collagen boosting formulations, contouring masks, lifting and firming anti-aging formulas

# Benefits PhytoCellTec<sup>™</sup> Goji

- Stimulates exosome signaling
- Increases collagen and elastin expression
- Tightens facial contours
- Minimizes fine wrinkles and deeper lines
- Sustainable production of raw material
